

SL SEALED SERIES

Features

The SL sealed connector series is adopted a mechanism that detects terminal incomplete insertion by using a dedicated jig.

These connectors can be directly secured to a bracket/stay on the car body. In addition, an extra clip can be attached to the connector to secure it to the car body.

(Note: Please contact our sales staff, if you have any questions regarding the dedicated jig.)

特長

SL 防水シリーズは、専用治具にて端子半挿入を検出する構造を採用しております。

コネクタは、ボデー側のブラケットに直接固定、或いはクランプ（クリップ）を介して固定することができます。

注意：専用の導通治具に関しては弊社営業担当にご確認下さい。
